

Shaik Karishma

Visakhapatnam, Andhra Pradesh Phone: 9391325009 — Email: shaikkarishma1615@gmail.com LinkedIn: www.linkedin.com/in/shaik-karishma-556178354

PROFESSIONAL SUMMARY

Computer Science undergraduate skilled in Python, data structures, and machine learning. Experienced in developing projects and analyzing data to derive insights. Strong problem-solving skills and a passion for technology-driven solutions..

EDUCATION

B.Tech – Computer Science Engineering (DS)	Raghu Engineering College	CGPA: 8.86
Intermediate-	St.Joseph College for Women(A)	PERCENTAGE: 91.5
10th(Secondary)-	St.Ann's High School Mangalpalem	PERCENTAGE-99.5

TECHNICAL SKILLS

Programming: Python, HTML, Java(Basic), C
Data Science: Pandas, NumPy, Scikit-Learn, Data Analysis, Visualization
Tools: Microsoft Word, Microsoft Excel, Powerpoint Presentation, Canva
Concepts: Machine Learning, Data Structures, DBMS, Statistics

PROJECTS

A/B Test Outcome Predictor

ML-powered system to forecast A/B testing results before reaching full statistical significance, inspired by experimentation frameworks used at Netflix and Airbnb.

- Developed a Bayesian inference-based prediction model to estimate A/B test winners up to 40% faster than traditional evaluation methods.
- Simulated and analyzed 12 experimental datasets, reducing average experiment runtime by nearly 3 weeks while maintaining reliable decision accuracy.
- Applied statistical modeling and probabilistic analysis to accelerate experiment-driven product decisions.

Personal Music Application

- Developed a personal music streaming application with a responsive UI using SwiftUI.
- Implemented backend logic and music processing features using Python

End-to-End RAG System

- Built a RAG pipeline using PDFs, documents, and databases with vector DBs like Pinecone, Chroma, and pgvector.
- Developed retrieval, ranking, and evaluation workflows using RAGAS and custom metrics.
- Added citation support and debugging logs for better transparency and monitoring.

INTERNSHIP EXPERIENCE

Data Science job Simulation– BCGForage (2025)

- Completed a virtual internship simulating real-world data science tasks in a business environment
- Performed data cleaning, exploratory data analysis (EDA), and visualization using Python

Introduction to Technology Apprenticeship-Accenture(forge)

- Gained hands-on exposure to technology consulting and business problem-solving
- Understood software development lifecycle (SDLC) and system design fundamentals

Solutions Architecture Job Simulation – Amazon (Forage):

- Learned fundamentals of cloud computing and AWS architecture
- Designed scalable, secure, and cost-efficient cloud solutions

CERTIFICATIONS

- NEC(National Entrepreneurship Challenge)-secured 44 rank |IIT BOMBAY 2025|
- Trust and Security with Google Cloud - simplilearn 2026 (powered by Google Cloud)
- Introduction to Artificial Intelligence-Infosys Springboard 2026
- Python Programming Hands-On -SkillRack 2025
- Data science job simulation-BCG(Forge) 2025
- Introduction to Technology Apprenticeship-Accenture(forge) 2025
- Solutions Architecture-Amazon(Forge) 2025

SOFT SKILLS

- Communication Team Collaboration • Time Management
